

## PUBLICATIONS

ANDRÁS LŐRINCZ

[HTTP://PEOPLE.INF.ELTE.HU/LORINCZ](http://people.inf.elte.hu/lorincz)

### 1. TABLE OF CONTENTS

- (1) Book
- (2) Refereed Book Chapters
- (3) Refereed Papers in Journals
- (4) Refereed Papers in Proceedings
- (5) Patents

### BOOK

- [1] A. Lőrincz. *Bridging Cortical Structure and Function*. ELTE Eötvös Kiadó, 2006. Available from: [http://www.eotvoskiado.hu/kiadvanyok/?item\\_Id=235](http://www.eotvoskiado.hu/kiadvanyok/?item_Id=235).

### REFEREED BOOK CHAPTERS

- [1] B. Pintér, Á. Bontovics, and A. Lőrincz. Reinforcement learning model for the emergence of common property and transhumance in Sub-Saharan Africa. In M. Taylor and K. Tuyls, editors, *Adaptive Learning Agents, 2009*, volume 5924 of *Lecture Notes in Artificial Intelligence*, pages 91–106. Springer-Verlag, Berlin Heidelberg, 2010. Available from: [http://nipg.inf.elte.hu/index.php?option=com\\_remository&Itemid=27&func=fileinfo&id=181](http://nipg.inf.elte.hu/index.php?option=com_remository&Itemid=27&func=fileinfo&id=181)
- [2] A. Lőrincz. Learning and representation: From compressive sampling to the 'symbol learning problem'. In B. Bollobás, R. Kozma, and M. Dezső, editors, *Handbook of Large-Scale Random Networks*, volume 18 of *Bolyai Society Mathematical Studies*, chapter 11, pages 445–488. Springer, Berlin, Germany, 2009. Available from: [http://nipg.inf.elte.hu/index.php?option=com\\_remository&Itemid=27&func=fileinfo&id=176](http://nipg.inf.elte.hu/index.php?option=com_remository&Itemid=27&func=fileinfo&id=176).
- [3] A. Lőrincz and G. Szirtes. Representation theory meets anatomy: Factor learning in the hippocampal formation. In J. Mayor, N. Ruh, and K. Panklett, editors, *Connectionist Models of Behaviour and Cognition II*, volume 18 of *Progress in Neural Processing*, pages 253–264, Oxford, United Kingdom, 2008. World Scientific Publishing. Available from: [http://nipg.inf.elte.hu/index.php?option=com\\_remository&Itemid=27&func=fileinfo&id=171](http://nipg.inf.elte.hu/index.php?option=com_remository&Itemid=27&func=fileinfo&id=171).
- [4] Zs. Palotai, S. Mandusitz, and A. Lőrincz. Computer study of the evolution of 'news foragers' on the Internet. In A. Abraham, C. Grosan, and V. Ramos, editors, *Swarm Intelligence and Data Mining*, volume 34 of *Springer SCI Series*, pages 203–220, Berlin, Germany, 2006. Springer. Available from: [http://nipg.inf.elte.hu/index.php?option=com\\_remository&Itemid=27&func=fileinfo&id=147](http://nipg.inf.elte.hu/index.php?option=com_remository&Itemid=27&func=fileinfo&id=147).
- [5] G. Szirtes and A. Lőrincz. Low level priming as a consequence of perception. In *Connectionist Models of Cognition and Perception*, pages 223–235, Singapore, 2002. World Scientific. NCPW7.
- [6] A. Lőrincz, B. Szatmáry, G. Szirtes, and B. Takács. Recognition of novelty made easy: Constraints of channel capacity on generative networks. In *Connectionist Models of Learning, Development and Evolution*, pages 73–82. Springer Verlag, 2001. NCPW6.
- [7] A. Lőrincz and Gy. Buzsáki. Two-phase computational model of the entorhinal-hippocampal region. In H. E. Sharfman, M. P. Witter, and R. Schwarcz, editors, *The parahippocampal region: Implications for neurological and psychiatric diseases*, 2000. Annals of the New York Academy of Sciences 911: 83–111. Available from: [http://nipg.inf.elte.hu/index.php?option=com\\_remository&Itemid=27&func=fileinfo&id=80](http://nipg.inf.elte.hu/index.php?option=com_remository&Itemid=27&func=fileinfo&id=80).
- [8] A. Miklós, Z. Bozóki, and A. Lőrincz. An improved theory of photoacoustic signal generation in gases and fluids. In O. Leroy, editor, *Physical Acoustics; Fundamental and Applied*, pages 511–516, New York, 1991. Plenum Press.
- [9] A. Lőrincz and A. Miklós. Ultrafast phenomena (Chapter V). In A. Mandelis, editor, *Progress in Photothermal and Photoacoustic Science and Technology*, volume 1, pages 429–490, Amsterdam, 1991. Elsevier. Principles and Perspectives of Photothermal and Photoacoustic Phenomena.

### REFEREED PAPERS IN JOURNALS

- [1] Z. Szabó, B. Póczos, and A. Lőrincz. Auto-regressive independent process analysis without combinatorial efforts. *Pattern Analysis and Applications*, 2010. Available from: [http://nipg.inf.elte.hu/index.php?option=com\\_remository&Itemid=27&func=fileinfo&id=144](http://nipg.inf.elte.hu/index.php?option=com_remository&Itemid=27&func=fileinfo&id=144).
- [2] Z. Szabó and A. Lőrincz. Complex independent process analysis. *Acta Cybernetica*, 19:177–190, 2009. Available from: [http://nipg.inf.elte.hu/index.php?option=com\\_remository&Itemid=27&func=fileinfo&id=175](http://nipg.inf.elte.hu/index.php?option=com_remository&Itemid=27&func=fileinfo&id=175).

- [3] A. Lórinč and G. Szirtes. Here and now: how time segments may become events in the hippocampus. *Neural Networks*, 22:738–747, 2009. Available from: [http://nipg.inf.elte.hu/index.php?option=com\\_remository&Itemid=27&func=fileinfo&id=179](http://nipg.inf.elte.hu/index.php?option=com_remository&Itemid=27&func=fileinfo&id=179).
- [4] K. A. Lázár, E. Csuhaĵ-Varjú, and A. Lórinč. Dynamically formed clusters of agents in eco-grammar systems. *International Journal of Foundations of Computer Science*, 20:293–311, 2009. Available from: [http://nipg.inf.elte.hu/index.php?option=com\\_remository&Itemid=27&func=fileinfo&id=166](http://nipg.inf.elte.hu/index.php?option=com_remository&Itemid=27&func=fileinfo&id=166).
- [5] B. Póczos and A. Lórinč. Identification of recurrent neural networks by Bayesian interrogation techniques. *Journal of Machine Learning Research*, 10:515–554, February 2009. Available from: <http://www.jmlr.org/papers/volume10/pocz09a/pocz09a.pdf>.
- [6] J. Jost, D. Helbing, A. Lórinč, and M. Middendorf. Editorial. *Theory in Biosciences*, 127:67–68, 2008. Available from: [http://nipg.inf.elte.hu/index.php?option=com\\_remository&Itemid=27&func=fileinfo&id=154](http://nipg.inf.elte.hu/index.php?option=com_remository&Itemid=27&func=fileinfo&id=154).
- [7] I. Szita and A. Lórinč. Factored value iteration converges. *Acta Cybernetica*, 18:615–635, 2008. Available from: [http://nipg.inf.elte.hu/index.php?option=com\\_remository&Itemid=27&func=fileinfo&id=163](http://nipg.inf.elte.hu/index.php?option=com_remository&Itemid=27&func=fileinfo&id=163).
- [8] A. Lórinč, Zs. Palotai, and G. Szirtes. Spike-based cross-entropy method for reconstruction. *Neurocomputing*, 71:3635–3639, 2008. Available from: [http://nipg.inf.elte.hu/index.php?option=com\\_remository&Itemid=27&func=fileinfo&id=162](http://nipg.inf.elte.hu/index.php?option=com_remository&Itemid=27&func=fileinfo&id=162).
- [9] L. Jeni, Gy. Flórea, and A. Lórinč. Infomax Bayesian learning of the Furuta pendulum. *Acta Cybernetica*, 18:637–649, 2008. Available from: [http://nipg.inf.elte.hu/index.php?option=com\\_remository&Itemid=27&func=fileinfo&id=161](http://nipg.inf.elte.hu/index.php?option=com_remository&Itemid=27&func=fileinfo&id=161).
- [10] V. Gyenes, Á. Bontovics, and A. Lórinč. Factored temporal difference learning in the New Ties environment. *Acta Cybernetica*, 18:651–668, 2008. Available from: [http://nipg.inf.elte.hu/index.php?option=com\\_remository&Itemid=27&func=fileinfo&id=160](http://nipg.inf.elte.hu/index.php?option=com_remository&Itemid=27&func=fileinfo&id=160).
- [11] Z. Szabó, B. Póczos, and A. Lórinč. Auto-regressive independent process analysis without combinatorial efforts. *Pattern Analysis and Applications*, 2008. (accepted). Available from: [http://nipg.inf.elte.hu/index.php?option=com\\_remository&Itemid=27&func=fileinfo&id=144](http://nipg.inf.elte.hu/index.php?option=com_remository&Itemid=27&func=fileinfo&id=144).
- [12] I. Szita and A. Lórinč. Learning to play using low-complexity rule-based policies: Illustrations through Ms. Pac-Man. *Journal of Artificial Intelligence Research*, 30:659–684, 2007. Available from: <http://www.jair.org/papers/paper2368.html>.
- [13] K. A. Lázár, E. Csuhaĵ-Varjú, and A. Lórinč. Peer-to-peer networks: A language theoretic approach. *Computing and Informatics*, 2007. (accepted).
