

4th International Central and Eastern European Conference on Multi-Agent Systems

12-14 September 2005, Budapest, Hungary

CEEMAS'05 – Welcome to Budapest!

After the successful CEEMAS conferences in St. Petersburg (1999), Cracow (2001) and Prague (2003), the CEEMAS Steering Committee decided that the next CEEMAS conference would take place in Budapest. This will continue the tradition that CEEMAS conferences always take place in the Central and Eastern European region. The programme committee of the conference series consists of well known researchers from the region and renowned international colleagues, showing the prominent rank of CEEMAS among the leading events in multi-agent systems. With its particular geographical focus, CEEMAS has become an internationally recognised event. The conference proceedings are planned to be published by Springer Verlag in the LNAI series as before.

The last conference in Prague was dedicated to bridging the gap between applied research achievements and the theoretical research activities including networks of excellence, thematic clusters, large-scale test beds and standardisation efforts. The new initiatives in the USA and the Framework 6 program of the European Union are changing the research landscape in the area of agents and multi-agent systems. We expect that in the future more and more details of the general frameworks, standardisation specifications, test bed environments and application scenarios will be worked out, therefore we intend to dedicate CEEMAS'05 to the fundamental research and application results of particular agent technology related problems in the wide area of scalable and reconfigurable multi-agent, service oriented and grid architectures, game theory, as well as in application scenarios of design and manufacturing, transport and logistics, military and space applications, tourism industry, e-commerce and many other areas.

The call for papers of CEEMAS'05 will be distributed in 2004. We expect that the deadlines will be March 2005 for submissions, April 2005 for notification of acceptance and May 2005 for camera ready papers. We are considering tutorial and poster sessions as well.

We welcome agent related meetings to be co-located with CEEMAS'05, so that many agent and multi-agent researchers can meet in Budapest in September 2005. Download this one page flyer from the download area of the web site below and distribute it in your organisation.

There is time until September 2005. Until then visit the web address below and take a virtual tour of Budapest and Hungary to get a feeling of what you will be able to visit when you attend CEEMAS'05. You find practical information on planning the trip in the useful links section. Stay tuned and visit regularly the web address below to learn the latest news.
